

Nucor Innovation Station Sponsorships

The Nucor Innovation Station, located at the entrance to the museum, is an opportunity for local companies and institutions to highlight their history, innovations, and what they bring to the CNY community. Sponsors curate, design, create, and install a 3-month featured exhibit.

MOST staff are available to assist with exhibit design and can support the sponsor team throughout the process to create an engaging and educational experience.

A public exhibit unveiling and ribbon cutting can take place on any day the museum is open to the public. Dignitaries and the media are invited to attend the event.

Sponsors also receive a tabling opportunity to host an information table with your literature, giveaways, raffles, demonstrations, and more.
